

# *PCCI STUDENT COURSE*

*Our K-9 Academy would like to invite you to our training center for one full day of training observation and answer all the questions needed.*

## WHY PCCI ACADEMY?

When you become a student soon enough you will notice our dedication, commitment and devotion of everyday one-on-one private and consistent training to you and your future dog.

PCCI training instructors and advisors will design a training program including days a week, hours, practice periods and theory indoor classes.

Our goal is to develop your knowledge and capability in practice, theory, behavior modification, obedience – basic and advanced, canine instincts, protection and tracking.

Once you have received all of these different theories and methods then it is time to professionalize your career.

1. Learning how to market yourself.
2. Dealing with your everyday customer or client.
3. Learn how to evaluate each and every dog.
4. Learn how to give the right answer to your client and their pet.
5. Learn how to develop a follow-up training program.
6. Learn how to design a training program that works for your client and dog.
7. Learn how to be consistent in your training and why.
8. Making sure that your finished product is what is supposed to be and not a maybe finished result.

If you have high expectations as a K-9 instructor you must apply discipline, consistency, focus and dedication.

PCCI can provide you with the most outstanding European training methods, working facilities – both indoor and outdoor and a top quality puppy or young adult. Also many problem pet training jobs for your handling and training experience.

Once a month every student will receive a written test once he or she understands our training foundation. If the student fails 30% of this test he or she will have to repeat the classes. Your initial tuition only covers for the first class and not for repetitions.

# PCCI Basic General Commercial Course.
